Office of the Director of Civil Supplies
and Controller of Prices in Mysore,

Bangalore Dated: 19th May 191 9.

From K. Matthan, Esquire, B.A.,
Director of Civil Supplies and Controller of Prices in Mysore.

To

C. S. Balasundaram Iyer, Esq., B.A.,
Chief Secretary to the Govt. of Mysore,
B a n g a l o r e.

Sir,

I have the honour to state that the balance of 800 tons of Burma rice out of March allotment and 500 tons out of April allotment that had been given to Messrs. R. Papanna and Sons are reported to have arrived at Madras per S.S. Bulimba. The balance of 500 tons allotted to Messrs. R. Papanna & Sons and 1,000 tons of whole rice and 500 tons of broken rice allotted to Messrs. Appana Ramachandra Rao & Co. out of April allotment were expected in Madras per S.S. Nicolybelozunton in the first week of this month. The total quantity is 3,300 tons including 500 tons of broken rice. I submit herewith for the approval of Government a memorandum showing the distribution of this rice. The distribution has been made in accordance with the requisitions received from Deputy Commissioners.

2. I beg to add that the Deputy Commissioner of Kolar has since asked for a further allotment of 300 tons for the Kolar district and it has been arranged to be sent to out of the quantity proposed to be kept as reserve in

in Bangalore.

3. In this connection, I also submit for the approval of Government a copy of a memorandum issued by me regarding arrangements for the sale of Burma rice imported by the Government.

I have the honour to be,

Sir,

Your most obedient servant,

Food Controller & Director
of Civil Supplies in Mysore.

KM/MPH.

Memorandum regarding the sale of Burma rice imported by the Government.

The following revised and consolidated instructions regarding distribution and sale of Burma rice are issued for the information and guidance of all officers concerned:-

1. The allotments of Burma rice (including broken rice) for the Mysore State are sanctioned from month to month by the Foodstuffs Commissioner for India on applications sent by the Food Controller in Mysore. With a view to enable the Food Controller to prepare his consolidated estimate of requirements, the Deputy Commissioners of Districts, the Presidents of the Bangalore and Mysore City Municipalities and the Special Magistrate, Kolar Gold Field, are requested to carefully study the requirements of the areas under their jurisdictions and send a consolidated forecast of their requirements for every month not later than the 5th of the previous month.

2. The allotment for each month is generally received in Madras before the

6

the middle of the following month and is distributed in advance between the several districts and local areas with reference generally to the indents received.

3. With a view to avoid delay and incurring of handling charges at Bangalor arrangements will as far as possible be made to book the rice direct from Madras Harbour to the several districts. The consignees should arrange to take deliver promptly, ascertain the weight of the consignment by actual weighment of a fair proportion of average bags and of all bags which appear to be short in the presence of the representative, if any, of the importer (in case of imports by private merchants under control). Shortages, if any, should be immediately reported to the Food Controller.

4. For payment of freight and other incidental charges, Deputy Commissioners are requested to make use of food supply advances held by them and have them recouped by sending bills to the office of the Food Controller.

5. The rice required for the Kolar Gold Field will be booked direct to Champion Reef or Oorgaum station. All

All other consignments for districts will be booked to the stations indicated by Deputy Commissioners. It should be noted that the railway authorities in Madras will not allow waggons to outstations for small quantities. For the purpose of checking the consignments also, it is desirable that all consignments for one district should be booked to the headquarters of the district or if it is not a railway station to the nearest broad gauge or metre gauge station. Distribution in the district should be arranged by the Deputy Commissioner. Charges for carthire may be met in the same manner as railway freight.

6. Every effort will be made to send the railway receipt to consignees as quickly as possible, but should there be any delay, the consignees should make arrangements to clear the goods on execution of indemnity bonds. The railway authorities will be addressed to give needful instructions to station masters in this behalf.

7. As a rule requirements from districts for Burma rice will be attended to only when received from Deputy Commissioners. In very urgent cases the Sub Division Officer or Amildar may address this office direct.

8.

8. Burma rice should only be sold hrough Government or Municipal depots r through Co-operative Societies approved y the Deputy Commissioner or by the egistrar of Co-operative Societies or ther public bodies approved by the Food ontroller. It should not be issued to erchants except in very special cases r without the concurrence of the Food ontroller.

9. When any consignment is despatched the price at which it may be sold to the general public at the several stations for which the supply is intended will be fixed by the Food Controller and intimated to the Deputy Commissioner. This price will be as near as possible to the actual cost price including freight and carthire.

10. The grain in the depots will also be utilised for distribution at cost price to the poorer classes at concession rates that may be sanctioned by Government from time to time (at present 6 seers a rupee). In the Bangalore and Mysore Cities these concession rates will be available only to persons to whom tickets have been issued. A similar elaborate arrangement

9

arrangement may not be necessary in other places, but care should be taken to see that sale at concession rates is restricted to persons whose names are borne on lists which should have received the previous approval of the Deputy Commissioner. The number of individuals to whom such concession is sanctioned in any local area should be intimated to the Food Controlled.

11. It should be borne in mind that as Burma rice is now much cheaper than other varieties of rice obtainable in the market, there is great demand for it and the available supplies are insufficient to meet the entire demand. The rice should, therefore, be issued only in limited quantities - not more than, say, a rupee worth to one individual at a time and every effort should be made to make one month's supply last till the next supply is received so that the reserve stocks kept by the Food Controller may not, as far as possible, be trenched upon. Instances have come to notice of supplies of Burma rice from Government depots being collected by petty shop-keepers and being sold again at a higher

higher price. Every effort should be made to prevent this.

12. Daily reports of transactions in depots should be sent to the Food Controller in the form already prescribed (vide this office No.7921-28 dated 2nd May 1919)

13. The realisations should be remitted to the Food Controller once a week by Remittance Transfer Receipt, except in the case of sales at Bangalore and Mysore Cities where the collections may be remitted to the Mysore Bank to the credit of the Food Controller.

9-5-1919. Food Controller in Mysore.
